

GROUP EVALUATION: CHSSN COMMUNITY PUBLIC HEALTH STRATEGY

5 Key Evaluation Questions in Participatory Evaluation

1. Did we do what we said we would do? *Describe briefly what was done, where it was done, who was involved, how were they involved, the relevance of doing what you did in assisting communities to gain knowledge and skills in their role in developing H&SS networks.*
2. What did we learn about what worked and what didn't work? Why? *What strategies worked well in involving members of the target population, what strategies worked, what did not work? Why did they not work? What were your key learning's, and those of the community? How appropriate were the project goals and objectives in carrying out your overall activity?*
3. What difference did it make that we did this work? *Changes in skills, knowledge, confidence. Was the information well received, used, etc..? Were there any unexpected impacts of the work? What factors in the project might account for the changes?*
4. What could we do differently? *Are there more effective methods for doing specific functions and/or activities?*
5. How do we plan to use evaluation findings for continuous learning? *How were the evaluation results of your work used, and by whom? How will the results of your work continue to be used?*
